CORPORATE OVERVIEW

IT-CNP, Inc. is a Government service oriented business enterprise headquartered in Columbia, Maryland. IT-CNP prides itself on its ability to strategically deliver information technology solutions to a diverse portfolio of Federal, State and Local Government customers. IT-CNP provides a variety of IT operations, cyber security, FISMA cloud hosting, and IT logistics as a standard set of its service offerings. IT-CNP also provides industry leading certified professionals with solid technical background experience that enable them to address a full range of IT hardware and support issues. Many of our personnel hold Secret and Top Secret level clearances with diverse government agencies.

IT-CNP has successfully performed on a multitude of government hosting and infrastructure information management and support contracts throughout Federal, State, and Local Governments. IT-CNP provides its government oriented web hosting services through its hosting division – GovDataHosting.Com, which was created to exclusively serve the demanding high availability and reliability needs of modern local, state and federal Government initiatives.

IT-CNP utilizes a formal set of policies, procedures, forms and manuals necessary to provide the proper control structures to ensure that all hosted systems are properly maintained and supported. Of significance are the requisite policies and procedures to support configuration control and correct inventory of equipment and security controls applied to specific hosted systems. IT-CNP's formal control structures have been carefully developed to integrate smoothly with NIST standards to ensure consistency and compliance with all the requirements entailed in applicable NIST publications, especially SP 800-34 Rev. 1, SP 800-53 Rev.3, and SP 800-137.

IT-CNP has a successful track record of serving a diverse portfolio of Government hosting oriented services, proven datacenter infrastructure support processes, NIST and DIACAP FISMA security compliant operational, management and technical controls, as well as robust subcontractor management processes and experience in a multi-vendor solution environment.

Core Values

Our customer support mission is to always provide platinum level support service. We are proud to serve our customers with solutions that meet most challenging business, technical and system performance requirements while offering 100% availability and performance guarantee. IT-CNP personnel are lead by these core values:

- Commitment and Assurance
- Pride
- Positive Attitudes
- Professionalism
- Organized and Structured
- Flexible and Compliant

Why IT-CNP?

- Strong and established management team
- Guaranteed secure environment and customer satisfaction
- Strong past performance and project execution team committed to accomplish various tasks
- Successful implemented strategic planning process
- Strong line of business that fortifies the organization and satisfies the client's needs

Benefits

- Superior Solutions
- Mitigated Performance Risk
- Government Specialized Vendor
- Extensive Track Record
- Experienced & Committed Personnel

IT OPERATIONS

IT-CNP provides a breadth and depth of knowledge that uniquely meets the requirements of modern government IT operations landscape. Through unique prescriptive, lessons learned combined with strategic recommendations IT-CNP effectively addresses today's demanding information technology infrastructure transformation needs, technologies and trends including:

- IT Infrastructure Operational Excellence
- Private/Public Cloud Infrastructure Strategies
- Enterprise Mobility
- Web-scale Information Technology
- Data Center, Server, Storage and Networking Trends
- Disaster Recovery and Business Continuity
- IT Infrastructure Cost Optimization

IT-CNP adopted the key principles and best practices of ITIL Service Management Framework as a set of guiding methodologies, resources and service excellence roadmap capabilities to deliver superior and reliable IT infrastructure operational solutions to public sector customers. ITIL framework has evolved into a process-based best practices focuses on a broader holistic service lifecycle.

IT-CNP's value comes from supporting the entire lifecycle of a system, from requirements definition, implementation/transition, modernization, sustainment and subsequent decommissioning.

IT-CNP provides fully managed system lifecycle services for Federal agency customers that include all aspects of technical implementation, operations and security compliance management.

Support Tools	Cisco Works, Tivoli, Veritas, Citrix, Novel, Remedy, HP OpenView, BMC, Sniffer, Spectrum, ARCserv, SNORT, Check Raptor, NetRanger, Nessus
Hardware	Cisco, Nortel, IBM, Sun, Dell, Compaq, HP, Marconi, Bay Networks, Ascend, Lucent, Nokia, Extreme Networks, DEC, Juniper
Database	Microsoft SQL Server, DB2, Oracle, Informix, JDBS, Sybase, FoxPro, Clipper, Lotus Notes, Dbase, Paradox, MySQL

CYBER SECURITY

Effective implementation of comprehensive cyber security strategy has become one of the most important national priorities of our times. Each government agency is individually responsible for continuation of improvements in its cyber security posture. Government organizations are experiencing an increased need for cost effective information assurance capabilities as well as improved management, control and response techniques.

IT-CNP provides specialized cyber security services that assist agencies in providing a safe and secure operating environment, while implementing a departmental information assurance processes to ensure that information security related policy directions as defined by legislative requirements as well as President's Management Agenda guidance and circulars on cyber security are implemented consistently across the enterprise.

IT-CNP's cyber security and audit personnel, best practices, lessons learned and information assurance technologies assist federal, state and local government customers in maintaining proactive cyber security posture.

Strategic Cyber Security Support Services

IT-CNP provides expert information assurance and cyber security consulting advice, guidance, and facilitation regarding current improvement practices, services, and support products to assist agencies in their information assurance and cyber security program management and efforts, which enable them to meet new challenges and continuously improve their mission performance.

Enterprise Cyber Security Program Support

The goal of IT-CNP's enterprise-wide cyber security program support is to improve the information security posture and reduce cyber security vulnerabilities of customer organization. This is accomplished by improving compliance with mandated regulatory acts and industry standards such as FISMA, OPM, FIPS, NIST, DIACAP, SSAE-16 and all other applicable cyber security regulations, policies, and procedures.

In order to reduce cyber security vulnerabilities our security experts support customers to continue developing enterprise-wide directives, manuals and other standards that comply with the kaleidoscope of Federal statutory and regulatory requirements. Compliance with the directives, manuals and other guidance by each agency's respective security program demonstrates improved cyber security performance to the satisfaction of external review bodies such as the Government Accountability Office (GAO), OMB, and independent public auditors.

By identifying vulnerabilities and implementing corrective measures, IT-CNP's security compliance experts assist government agencies to effectively reduce the number of opportunities for system compromise, resulting in an overall improvement in the level of protection afforded our information resources. Ongoing monitoring is used to continuously assess the security posture of our operational environments to detect new or unpatched vulnerabilities, offering opportunities for proactive remediation and control.

FISMA CLOUD HOSTING

Through it's hosting division - GovDataHosting.Com, IT-CNP is able to provide specialized turn-key FISMA compliant solutions to all U.S. Government entities including all civilian executive departments (FISMA NIST Methodology), independent agencies, government corporations, boards, commissions, as well as U.S. Department of Defense (FISMA DIACAP Methodology), Federal law enforcement and Intelligence community.

IT-CNP's Cloud Offers:

- FISMA NIST Cloud Hosting
- FISMA DIACAP Cloud Hosting
- FISMA Private Cloud Hosting
- FISMA S-a-a-S Hosting
- SSAE-16 Cloud Hosting
- Custom Hosting Solutions

Key features of IT-CNP's FISMA Cloud Hosting:

- Accelerated FISMA C&A (A&A) Path
- NIST and DIACAP Compliant Turn-Key Solutions
- Lower Implementation Risk
- Reduced FISMA C&A and Operating Costs
- PMI Certified Implementation Management Team
- U.S. Based Support Team
- 100% Infrastructure Availability SLA
- Responsive High Priority Support
- Secure FISMA Hosting Delivery Capabilities
- Active Portfolio of FISMA Compliant Federal Customers
- Authorization To Operate (ATO) Guarantee
- Convenient All-Inclusive Fixed Price Model
- On Demand Resource Utilization-Based Cloud Price Model

IT-CNP provides industry leading certified professionals with solid technical background experience, able to support a full range of cyber security, hosted hardware and software support issues. Hosted systems within our secure NIST and DIACAP compliant telecommunications infrastructure are supported by technology specialists experienced in all aspects of FISMA compliance.

Our Government customer hosted systems include a wide scope of solutions that range from single dedicated server to large-scale high availability clustered solutions with the use of complete hosting service failover to our alternate disaster recovery site.

IT-CNP utilizes a number of proven cost-effective tools, processes and procedures to leverage its existing technology infrastructure and security compliance fabric to reduce the initial and on-going system operating costs associated with FISMA compliance.

Unlike other service organizations, IT-CNP takes pride in its track record of technical expertise, responsiveness and total customer satisfaction. We are the industry's only support team that routinely goes above and beyond expected scope of support to ensure that customers receive the world-class service they expect.

IT LOGISTICS

IT Logistics is the process of planning, implementing, and controlling the effective and efficient flow of software, hardware and related IT services from the point of origin to the point of consumption by technology end users.

IT-CNP specializes in effective development and management of optimized IT service supply chain that lowers costs and enhances mission value for our government customers. We provide the following logistics support services in support of our customers' requirements:

- IT Project and Program Management
- Program Control
- IT Acquisition and Integration Support Services
- Program Outreach
- System Engineering and CIO Support
- Business Data Analytics
- Market Research and Special Studies

IT-CNP provides oversight and guidance to ensure projects are successfully executed on-time and within the assigned budget parameters. We also provide expert techniques and resources to conduct inspection, cleaning, transforming, and data modeling with the goal of discovering useful information, suggesting conclusions, and supporting decision making.

IT-CNP provides senior-level expertise and Subject Matter Experts (SMEs) in performing studies and analyses to address strategic and business issues that directly relate to the activities required to achieve our customers' strategic goals. We perform data analytics on acquisition related data residing in several financial and acquisitions systems and gather data from these sources to conduct in-depth analysis to deliver current and future state of all acquisitions and contracts.

IT-CNP's information technology program and project management support services are based on the Project Management Institute (PMI) Project Management Body of Knowledge (PMBOK) methodology, experience, customer agency-specific processes and lessons learned supporting multiple customers. Activities representative of our project and program management support are:

- Support all phases of the project lifecycle (Initiating, Planning, Executing, Monitoring and Controlling, Closing)
- Effectively manage and analyze a portfolio of projects through program management
- Review, assess, and analyze program requirements, goals, and objectives
- Assess and implement strategies, courses of action and proposals
- Recommend integration of technical directives and next generation system capabilities
- Review, assess and analyze contract deliverables and status reports
- Provide technical management support for the preparation, coordination, facilitation and post evaluation of program management reviews/meetings, technical reviews and other program related events
- Support and attend meetings, prepare agendas, minutes, and other meeting documentation

IT-CNP supports the procurement of brand name software and hardware for customer personnel. We also support acquisition of professional services for the supported programs and program personnel.
