

SECURING AMERICA'S INFRASTRUCTURE

IT-CNP delivers premier information technology solutions to a portfolio of Federal, State and Local Government customers. We provide a variety of IT operations, cyber security, FISMA compliant hosting and IT logistics services as a core set of its offerings and supplies industry leading certified professionals with proven government and technical experience. Having a management team comprised of seasoned industry professionals with diversified IT service backgrounds and capabilities, IT-CNP is able to support demanding government technology mission requirements with emphasis on IT service management efficiency, cost effectiveness and 100% customer satisfaction.

100% CUSTOMER SATISFACTION PHILOSOPHY

COST EFFECTIVE SOLUTIONS

EXTENSIVE GOVERNMENT SUPPORT EXPERIENCE

IT OPERATIONS

Originally founded as a high availability network infrastructure consulting company, IT-CNP continues to provide technology infrastructure and operational support services based on decades of effective government implementations and Information Technology Infrastructure Library (ITIL) best practices. Through lessons learned, our unique perspective and strategic recommendations IT-CNP delivers efficient mission critical technology infrastructure support. Lessons learned lead to unique perspective which then leads to strategic recommendations.

CYBER SECURITY

Our cyber security practice consists of information assurance solutions that include cyber security governance development, threat and impact assessment, contingency planning, on-going risk analysis, security compliance audit, cyber security compliance reporting, vulnerability remediation, security awareness training, penetration testing, incident response, forensic support, as well as independent cyber security verification and validation.

FISMA CLOUD HOSTING

IT-CNP's FISMA Cloud Hosting offerings consist of the hosting industry's best practices applied at our FedRAMP-certified and audited cloud datacenters that feature: multiple bandwidth providers, precision environment, conditioned redundant power, 100% availability SLA, over 300 implemented management, operational, technical controls, and individual security controls to accommodate the most demanding cloud security needs required by DOD and civilian agency hosting requirements.

IT LOGISTICS

IT-CNP specializes in government IT supply chain optimization that lowers costs and enhances mission value for our government customers. We provide logistics management services in support of the following public sector customer requirements: IT project, program and portfolio management, efficient program control, IT acquisition and integration support, program outreach, CIO advisory, business data analytics as well as market research.
